ROBEM I Let  $\phi$  is representation of  $GL_n(K)$  over  $K^n$ . And  $\phi(A)\alpha := A\alpha$ . Prove: $\phi$  is faithful and irreducible and n-dimensional.

ROBEM II For  $A \in GL_n(K)$ , let  $\psi(A)X = AX, \forall X \in M_n(K)$ . Then:

- 1.  $\psi$  is  $n^2$ -dimentional representation of  $GL_n(K)$  over K.
- 2. For  $j: 1 \leq j \leq n$ , let  $M_n^{(j)}(K) := \{(a_{ik})_{n \times n} : a_{ik} \neq 0 \to k = j\}$ . Prove  $M_n^{(j)}$  is invariant subspace of  $GL_n(K)$ . Let  $\psi$  is subrepresentation of  $\psi$  in  $M_n^{(j)}$ , prove  $\psi_j$  is irreducible and  $\psi = \bigoplus_{j=1}^n \psi_j$ .
- 3. Prove  $\psi_i \cong \phi$ , where  $\phi = (\mathbb{R}^{OBEM} I).\phi$

ROBEM III Let  $K = \mathbb{C}$  and n = 2 in (Group representation second homework).(Problem 3), prove the subrepresentation of  $\phi$  over  $M_2^n(\mathbb{C})$  is irreducible.

**B**OBEM IV Assume  $n \geq 3$  and  $n \nmid \text{char } K$
